**Course Outline
27 September 2018**

Title: Implementing the new ICD-11 diagnostic guidelines for mental disorders: Practical training for clinicians

Chair: Geoffrey M. Reed, World Health Organization, Geneva, Switzerland

Co-Chair: Rebeca Robles García, National Institute of Psychiatry Ramón de la Fuente Muñiz, Mexico City, Mexico

Brief description:

This workshop will provide practical training on the use of the *Clinical Descriptions and Diagnostic Guidelines for ICD-11 Mental, Behavioural and Neurodevelopmental Disorders*. This is the diagnostic manual designed for use by mental health professionals in clinical settings, which will have been published by the WHO Department of Mental Health and Substance Abuse prior to the World Congress. The training workshop will be geared toward psychiatrists in clinical practice. Material on the main features of the new ICD-11 guidelines and changes from ICD-10 will be presented by leading global experts who have been integrally involved in the development of the ICD-11. The workshop will emphasize active participation through application of the new guidelines to clinical vignettes based on real cases and discussion of diagnostic dilemmas. The workshop will cover some of the areas of most central concern to psychiatric practice and that account for the greatest proportion of mental health service utilization: 1) Schizophrenia and Other Primary Psychotic Disorders; 2) Mood Disorders (including Bipolar Disorders and Depressive Disorders); 3) Anxiety and Fear-Related Disorders; and 4) Obsessive-Compulsive and Related Disorders.

Topics and Faculty:

1. ***Schizophrenia and Other Primary Psychotic Disorders***
Wolfgang Gaebel, Heinrich-Heine University, Düsseldorf, Germany
2. ***Mood Disorders (including Bipolar Disorders and Depressive Disorders)***
Mario Maj, University of Naples SUN, Naples, Italy
3. ***Anxiety and Fear-Related Disorders***
Cary Kogan, University of Ottawa, Ontario, Canada
4. ***Obsessive-Compulsive and Related Disorders***
Dan J. Stein, University of Cape Town, South Africa

Learning Objectives:

As a result of participating in the course, participants will be able to:

1. Describe the major changes in the structure and content of diagnostic categories of ICD-11 mental disorders as compared to ICD-10.
2. Be ready to apply in daily practice the new classification for Psychotic Disorders, Mood Disorders, Anxiety and Fear-Related Disorders, and Obsessive-Compulsive and Related Disorders.
3. More effectively support the implementation of ICD-11 in mental health service settings.
